EXPERIENCE

GATEWAY CAR RENTAL | FRONT-END DEVELOPER INTERN
From: June|2023 to Aug|2023 , Abu Dhabi, UAE
- Helped the company to manage the data of Cars
- By Implementing the way to hardcode all the data and then mapping it
- The Website has to be launched in a few days and suggested that before working on the Backend Server.
- Front-end Intern

GATEWAY CAR RENTAL | GRAPHIC DESIGNER
From: Jan|2023 to Aug|2023 , Abu Dhabi, UAE

- This was my full-time job there, I used to do every graphic designing project.
- I solely managed all the things related to this field.
- I have given a Company a whole new Identity from making a Logo for them to making choosing the color Scheme.
- Full-time Designer

PROJECTS

E-COMMERCE WEBSITE
Repo | Live Demo

Developed a React e-commerce site with data sourced internally, featuring a functional cart system and comprehensive e-commerce capabilities, while ensuring full responsiveness through Tailwind CSS styling. It is leveraging Redux for efficient cache memory management

YOUTUBE CLONE
Repo | Live Demo

Designed and developed a feature-rich React-based YouTube Clone with a live chat, nested comment section, and optimized search bar, leveraging Redux for efficient cache memory management and outperforming Flipkart's API calling efficiency.

JAVASCRIPT FIGHTING GAME
Repo | Live Demo

Created a fighting game with pure JavaScript that can be played by 2 players. I learned many things through this project and finally was able to create something that is responsive in terms of gameplay. It also showcases JavaScript as the commanding language.

REACT ADMIN DASHBOARD
Repo | Live Demo

Developed a React Admin Dashboard that can be used to integrate with many apps like e-commerce sites, the medical field, and local businesses. It has both Dark Mode and Light Mode, and the entire project is integrated with Nivo charts to dynamically display information.
